### Workshops

All sessions are open to all and are available both morning and afternoon unless stated otherwise

#### Workshop 1

### Fire Investigation

The Fire Investigation workshop will be run in two parts:

- 1: Lucie Poxon from Nottinghamshire Fire & Rescue Service's Arson Reduction Investigation Team (ARIT) will present a case study of a fatal fire attended by Lucie & her team in Nottinghamshire.
- 2: Watch Commander Nikki Harvey from Hertfordshire Fire & Rescue Service will introduce Fire Dog Reqs (and her new puppy in training!), providing an overview of the capability of hydrocarbon detector dogs and giving a demonstration of Reqs at work. Facilitated by Nottinghamshire FRS/Hertfordshire FRS

#### Workshop 2

### Promotion & Progression

In the 21<sup>st</sup> Century the UK FRS is undergoing a cultural shift and evolution of the service it provides to meet the changing needs of our communities. To support this the sector is looking for passionate and driven individuals, willing to offer different views and approaches to help lead this and ensure the FRS can deliver a sustainable and valued service. This workshop will explore leadership and promotion within the sector, focusing on:

- Why undertake promotion?
- Opportunities
- Barriers
- Confidence
- Resilience
- Preparation
- Support

Facilitated by Derbyshire FRS

### Workshop 3

## Reality in Virtual Reality

Come and experience the training revolution see how easily you are immersed and start to believe the virtual world is the real world, your brain will do it all for you as it fills in the gaps  
Virtual reality the training of the future has arrived, carryout a full fire investigation in the virtual world, interact with the environment, take photographs for evidence, once you have come up with the cause watch the burn through 360-degree filming seeing how the fire started, developed and spread. Were you correct in your finding?

See the massive potential this type of training will have on fire services training over the coming years, it will not re-place the already world class training we already provide but enhance it in a blended learning approach.  
Presentation followed by demonstration.

Facilitated by Leicestershire FRS

### Workshop 4

## Road Safety 360 films leading the way worldwide

Experience the VF4-360 road safety film in a totally different way, totally immersed as the front seat passenger, see the issues that caused distraction leading to an RTC, see the emergency services turn up and deal with the incident, talk to the paramedic who is not really there.

The see the alternative ending using BCTS (Behaviour Change Techniques) to encourage attitude and behaviour change in the driver and passengers.

The new "90 Seconds Life Savers" covering pedestrian, push bike and motorbike safety, where we employed a stunt co-ordinator and stunt team to give the 360 films more realism.

Facilitated by Leicestershire Fire & Rescue

### Workshop 5

## XVR incident Command

This is an opportunity for delegates to experience the role of Incident Commander. There will be a range of different incident types for you to experience. You can be either an experienced Incident Commander already or you may be wanting to try this role for the first time (in both operational or support roles). The instructors will be there to coach and support you whilst also involving other delegates in your decision making process. The instructors use XVR which is a virtual reality simulation in the classroom.

Facilitated by Derbyshire FRS
